Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on May 11, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Application Number 10/409,409 has been reviewed and is NOT accepted.

The application/patent being disclaimed has been improperly identified since the number used to identify the pending reference application is incorrect. The correct number is Application Number 10/409,409.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergersen (5,645,420). Bergersen discloses a removable elastic positioning appliance comprising a shell having a hollow cavity shaped to receive and reposition teeth, the shell having at least one protrusion 60 disposed along an edge of the hollow cavity and contacts at least one received tooth and it is capable to assist in holding the appliance in position. Figures 6-9 show the protrusion configured to contact an interdental area (figure 7), to contact a tooth along at least a portion of its gingival margin (figure 9), and a continuous protrusion which is configured to contact a tooth along the gingival margin and interdental areas (figure 6). The protrusion is mountable on the appliance.

Response to Arguments

4. Applicant's arguments filed May 11, 2006 have been fully considered but they are not persuasive. The prior art shows the structural limitations as claimed. It is not understood why Applicant emphasizes "positioner" in Bergersen, as the preamble to the claims read "positioning appliance". Figures 6 and 7 show the protrusion "configured to contact an interdental area" and figures 8 and 9 show the protrusion configured to contact a tooth along at least a portion of its gingival margin. It is noted that Bergersen states that reshaping (by the way of protrusion) is used "to thereby firmly hold those selected teeth in a precise position" and being that the protrusion is attached to the appliance; the protrusion of Bergersen is capable of performing the functional limitation in the article claim "to assist in holding the appliance in position". A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3732

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
